

Modern Classic

PRO VLA II

TWO CHANNEL VACTROL/TUBE LEVELING AMPLIFIER

The ProVLA II is a tube driven Vactrol®-based Compressor / Leveling amplifier capable of delivering a far more musical natural sounding and sonically transparent compression than competitive units in its class.

ProVLA II's Opto-electronic design allows a far more transparent and musical sounding compression without sounding aggressive or un-natural. Its Vactrol based optical electronic circuitry is the basic component of the classic highly sought after compressors of past.

This VCA-less level detection circuit, coupled with a 12AT7 vacuum tube in the gain stage makes the Pro-VLA II the ideal dynamic control device for critical audio applications.

- **VCA-Less Vactrol Opto-Compression Design**
- **Mastering Quality Audio Signal Path with Tube Gain Stage**
- **Enhanced Stereo Link Mode**
- **Variable Threshold, Ratio & Output Controls**
- **Comprehensive LED Backlit VU Input/Output Level Metering**
- **Operates at +4dBu or -10dBu Inputs & Outputs**
- **Active Balanced XLR And 1/4-Inch Inputs & Outputs**
- **Internal Toroidal Transformer to Reduce Mechanical & Electrical Hum**
